A Grand New Start: Tippecanoe Branch Reopening

The grand reopening of the Tippecanoe Branch was held on Saturday, December 12, 2015. More than 1,600 visitors attended the event which began with remarks by Mayor Tom Barrett, Alderman Terry Witkowski, Board of Trustees President John Gurda, Foundation Board Vice President Nancy Hernandez, and City Librarian Paula Kiely. After the ribbon cutting, the Ronald Reagan High School Jazz Combo entertained guests who enjoyed crafts, story times, and giveaways from the library and the Garden District Neighborhood Association.

The renovated branch features a new community room, dedicated collections for adults, teens and children, an automated sorter for 24/7 material return and check-in, new windows and seating along Howard Avenue, children’s area with early learning materials, teen area with technology for videography and games, a Secret Garden for outdoor story times and activities for children, a coffee vending machine, and green landscaping.

The renovation of the Tippecanoe Branch, a 16,900 square foot stand-alone building, was led by architectural team Engberg Anderson and constructed by Creative Constructors at a cost of $4.5 million. Funding for the project came from the City of Milwaukee’s capital projects fund. Special features including the Secret Garden and the reinstallation of “The Spirit of the Manitou” sculpture by Guido Brink were funded by the Milwaukee Public Library Foundation and gifts from private donors.
There’s no question that the Internet provides access to helpful information – from news and travel to business and science and everything in-between. The trick is knowing whether the information you’re accessing is accurate, timely, and from a reliable source. While getting the right answer is always important, it can be critical when it involves health information.

The library has always been a provider of authoritative health information, whether patrons call Ready Reference with quick questions or seek more extensive information on their own through our strong circulating book collection.

But who hasn’t used the Internet to try to answer a health question? While the Internet can be a challenging place to find factual information among all the opinions and theories, the Library has databases that can help you find accurate and up-to-date information on a variety of health questions.

February is American Heart Month, and a good time to take a look at databases offered through the Milwaukee Public Library that cover the topic of health:

**Consumer Health Complete** – A great starting place for patient-oriented information with many images and a nice medical dictionary.

**Health Source: Consumer Edition** – Information from popular magazines, reference books and pamphlets that summarize common health topics.

**Health Source Nursing/Academic Edition** – For health professionals, includes technical and cutting edge information on specific health research and treatments.

**Alt HealthWatch** – Focuses on natural, holistic and alternative medicine reports from authoritative publications.

**AFHS Consumer Medication Information** – Provides patients with plain language drug information in both English and Spanish.

**Science Reference Center** – For students interested in health science topics, good for reports or obtaining information on a kid-friendly level.

Take a look at these and all the databases offered by your library at [www.mpl.org/databases/all/](http://www.mpl.org/databases/all/). Start your Internet search with the people you’ve always trusted for accurate and reliable information.
